

Hello Sailor,

Now that the British Marine Federation had advised the marinas that they can allow boatowners, and not just contractors, inside their marinas we have finally been able to drive down to Chichester marina and check Star out, give her a wash and scrub and polish, and run her engines.

Like you we now wait for when we are finally allowed to go places. Is it the journey or is it the destination? We probably like both equally.

Please find attached our Summer 2020 newsletter in .pdf format. As before if anyone is still unable to read a .pdf please let me know by return and I will send it in its original Windows .docx format.

These submissions are of course what helps make the newsletter interesting reading, so do send in reports of interesting trips, experiences, problems and technical tips for sharing. In response to my earlier plea I have received one interesting technical article concerning an electrical problem on an Aquastar 430, as well as the second instalment of the European travels of the intrepid Aquastar 33 Moonspirit.

Please do send me some more for our next (Christmas) newsletter.

Don't forget there are the 'Wanted & for Sale' as well as the 'Member's forum' sections of the club website for you to use.

Of course, if anyone wants me to mention anything in a newsletter as well, whether a query, or to advertise something, do please let me know.

Hoping that soon we all will be able not only to visit our boats but actually also have meaningful excursions in them.

Happy sailing,

Ingvar Svenson (Commodore).
